

2025 ACCENT

The wait is over

The wait is over: The new Accent has arrived with a bold, new design and exciting features. One of Hyundai's most popular and successful models has been completely redesigned, bringing it into the digital age with fascinating additions like the horizon LED lamps. To keep you well-connected, the new Accent comes equipped with an 8-inch multimedia control system that seamlessly interfaces with your smartphone, multiple USB recharging ports, and much more.

Boldly different

In a world of lookalike sedans, the new Accent stands out with its distinctive horizon lamp—a unique lighting signature that sets it apart on the road. The black chrome parametric grille and striking alloy wheels add the perfect finishing touches.

Horizontal LED lamp

LED headlamps (Multi MFR) / Black chrome parametric grille

Outside mirrors and turn signal indicators

LED rear combination lamps

Sporty performance

The new Accent's engines offer powerful performance when needed. The 1.5-liter gasoline engine boasts a superior power-to-weight ratio with its all-aluminum construction, while the diesel engine delivers impressive fuel efficiency and ample torque.

1.5 MPi Gasoline engine

115 Maximum Power ps/6,300 rpm 14.7 Maximum Torque kgf-m/4,500 rpm

Paddle shifters

When you're in the mood for sportier driving, paddle shifters let you change gears effortlessly with the flick of a finger, all while keeping your hands on the wheel.

Hyundai SmartSense

Lane Following Assist (LFA)

Keep you safely centered within the lane using its front view camera to monitor lane markers.

Forward Collision Assist (FCA)

If there's danger of a collision with a car or a pedestrian, FCA's front camera gives you an early warning and, if necessary, FCA automatically applies the brakes to prevent the collision.

Blind Spot Collision Avoidance Assist (BCA)

BCA uses radar to monitor both of your blind spots. If a vehicle is detected in the blind spot while the turn signal is flashing, BCA will automatically apply left or right side front braking before your attempted lane change thus helping you avert an unsafe lane change and a potential collision.

Lane Keeping Assist (LKA)

On detecting an unintentional lane departure, a warning is triggered and, if necessary, LKA will automatically provide corrective steering input to keep you within the lane.

Rear View Monitor (RVM)

For safer parking, a high-definition camera monitors the situation behind, and includes a graphic overlay to assist with parking.
